We as **NIKIRUSH INVESTMENT COMPANY LIMITED** has financed and supported small scale miners for several years in East Africa and Congo, whereas those small miners are supplying products and exchanging with Development of real estate business.

Within past period challenges, achievements, and working capacity increased due to high demands of our legitimate clients.

Accordingly, we secure very smooth managements rolls has been established based on latest technology that match with international norms of trade with concerned authorities in securing the export of products to the end users.

NIKIRUSH INVESTMENT COMPANY LIMITED

Our company records are with highest quality authorized with permissions and approvals once it comes to the performance and execution of our export division.

RAB & AUGER DRILLING

NMGL has invested in its own drilling capability in order to achieve fast, efficient, low cost first-pass exploration data. The drilling team is capable of deploying rapidly to site where they are accommodated in their own mobile field camps and capable of gathering field data from below regolith, the resulting samples are transported swiftly to accredited laboratories in Africa, where our strategic relationships ensure optimal service. The drill rig which is mounted on an all-terrain vehicle is capable of both RAB and Auger drilling and can drill down to depths greater than 100 meters in favorable ground conditions. Its rugged design and 4x4 functionality makes it highly mobile and will enable it to access rough terrain and road conditions conventional truck mounted drill rigs cannot operate in. This should enable the Company to operate during periods of seasonal rain thereby extending the length of the effective annual drilling season.

LOGISTICS SUPPORT

NMGL's field teams are highly mobile and capable of rapid deployment thanks to a well-developed logistics support structure based out of our operations office. Within easy reach of the highly prospective gold belts, NMGL is able to support exploration projects in **Democratic Republic of Congo, Angola, Namibia, Kenya, Uganda, Tanzania, Burundi and Zambia.**

Strategic Future Plan

Our team carefully focusing at the present time in providing lubricant facilities either for our transportation company fleet, domestic and international market with new concept in professional manner focusing in the quality of products.

Local market in Kenya, Uganda and Tanzania will be focused in general with strong marketing strategic plan, concentrating in most famous stations up to minor lubricants provider through the proper marketing by showing up new concepts in marketing of products.

The great name of United Arab Emirates products will support us to lead our marketing plans as well as the products quality by encouraging the end user to change their personal usual vision to the cheap lubricants provided in the local market at present time.

Our core is not the fast benefits which will come by time, but our main goals are to provide the best product and sale out a huge quantity and cover East Africa.

NIKIRUSH INVESTMENT COMPANY LIMITED

It will be honor for NIKIRUSH INVESTMENT COMPANY LIMITED to be ADNOC LUBRICATNTS agent in Kenya, Uganda and Tanzania, whereas we assure our best service to market your valuable products in professional standard that match with international marketing norms.

Our present challenges will be to proof our self among old suppliers with ADNOC Lubricants division blessing and support, whereas, we will serve your core to be number one in the market.

Our International Trading Division for commodities will assign well trained young employees only for ADNOC products marketing and special opening ceremony to launch the products in the market.

We provide clients with consistent and reliable logistics service distribution at the best value.
